

MID Semiannual Well Run Average Depth to Groundwater

Notes:

1. The data points shown are averages over a large area. Specific groundwater elevations within the monitoring area could have significantly higher or lower elevations. The data is intended for representation purposes only and should not be used as a decision making tool. Madera Irrigation District shall be held harmless against any unauthorized use or replication of the data.
2. The 2015 California State Groundwater Elevation Monitoring (CASGEM) Plan ended the continuous measurement of certain wells without driller's logs. A new data series beginning Fall 2015 was developed.
3. 2016 and 2017 data sets were amended in 2018 for consistency and accuracy purposes.
4. The 2022 California State Groundwater Elevation Monitoring (CASGEM) Plan integrated with the Sustainable Groundwater Management Act (SGMA).
